NATIONAL CERTIFICATE (VOCATIONAL)
INTRODUCTION TO COMPUTERS
NQF LEVEL 2
TIME: 3 HOURS
MARKS: 100

INSTRUCTIONS AND INFORMATION

1. Answer all the questions.
 2. Read all the questions carefully.
 3. Number the answers according to the numbering system used in this question paper.
 4. Use only a black or blue pen.
 5. Write neatly and legibly.
-

QUESTION 1

1.1 FIGURE 1 below shows the truth table for a digital electronic circuit.

A	B	Z
0	0	0
0	1	1
1	0	1
1	1	1

FIGURE 1

Study the table and answer the following questions:

- 1.1.1 Write a Boolean expression for output Z in terms of inputs A and B. (2 × 1) (2)
- 1.1.2 Draw the symbol represented by the Boolean expression determined in QUESTION 1.1.1. (3 × 1) (3)
- 1.2 List the FOUR most common logic functions that represent positive logic. (4)
- 1.3 Draw the switching logic circuit required to represent the start/stop application of a motorised band-saw employing two-handed safety. (8)
- 1.4 Draw the truth table of a three-input early-warning alarm system employing an OR gate function on an automated conveyor belt. (8)
- 1.5 Explain the difference between mechatronic products and hard drive. (2 × 2) (4)
- 1.6 Give ONE advantage of a digital circuit. (1)
- [30]**

QUESTION 2

- 2.1 Computers are capable of performing arithmetic, logical and data manipulation operations on binary numbers.
- The arithmetic circuit in a computer is part of which CPU component? (1)
- 2.2 How is a basic computer made up? (2 × 1) (2)

52)

-4-

- 2.3 Calculators and computers are both electronic devices that process information.
Explain the difference between a calculator and a computer using a table.
(5 × 2) (10)
- 2.4 Name the TWO most common types of secondary storage devices. (2 × 1) (2)
- 2.5 List FIVE network protocols that are commonly used today. (5 × 1) (5)
- 2.6 How can you protect computers against static charges? (2 × 1) (2)
- 2.7 What can happen if the computer's vents are blocked? (2 × 1) (2)
- 2.8 Is it a good idea to eat or drink when using a computer? (1)
[25]

QUESTION 3

- 3.1 Explain the term *computer file management*. (2 × 1) (2)
- 3.2 In computing, a boot refers to the process of starting up a computer.
3.2.1 Name TWO types of boots. (2)
3.2.2 Explain the usage of each type you mentioned in QUESTION 3.2.1. (2 × 2) (4)
- 3.3 Name THREE mechatronic-related application software used in an automated industry. (3 × 1) (3)
- 3.4 Briefly explain the File Explorer. (2 × 1) (2)
- 3.5 The CPU of a computer is faulty.
Draw a block diagram showing the procedure to follow when replacing the CPU. (5 × 1) (5)
- 3.6 Briefly explain all FIVE of the possible causes for a printer to appear completely unresponsive/dead. (5 × 1) (5)
- 3.7 The desktop is important and serves more than one function.
Name TWO functions of the desktop. (2 × 1) (2)
[25]

QUESTION 4

- 4.1 A document with the name 'Application for student loan' needs to be saved to the folder 'Student Loan'. This document is created in the My Documents folder.
- List the FIVE steps to be followed to save/copy the document. (5 × 1) (5)
- 4.2 Previewing a document gives you the chance to see if there is anything that needs changing or correcting before you go to print.
- Give TWO steps to follow when the need arises to preview your document. (2 × 1) (2)
- 4.3 What is MS PowerPoint used for? (2 × 1) (2)
- 4.4 Is it possible to do mathematical calculations on an MS Excel spreadsheet? (1)
- [10]

QUESTION 5

- 5.1 Name FOUR basic navigation buttons in a web browser that control your movements on the web. (4 × 1) (4)
- 5.2 What is another name for *hyperlink*? (1)
- 5.3 Give TWO advantages of sending and receiving an email. (2 × 1) (2)
- 5.4 Explain what a Uniform Resource Locator (URL) is. (2 × 1) (2)
- 5.5 When would you use a distribution list? (1)
- [10]
